Extensive reading is...

- reading at the right level
- reading with comprehension
with minimal dictionary usage
- reading a lot
- reading independently
- reading silently

So, if there's easy access to a dictionary...

- Does it affect reading confidence and enjoyment?
- Do learners use different reading strategies?
- Is ability to guess from context affected?

Participants

- 6 classes of 1st year English majors
- 3 treatment & 3 control groups
- Treatment = Xreading dictionary access

What strategies do learners use?

So, if there's easy access to a dictionary...

- Do learners use different reading strategies?
 - Still rely on context clues and guess meaning.
- Is ability to guess from context affected?
 - No significant differences between treatment & control.

Next Steps

- Gather **learner experiences** of ER with dictionary access, especially reading confidence and enjoyment
- Incorporate **guessing from context training**

The fish used to be cheap, but it is very **gloch** now.
