

Net Gain: Multiplatform Approach to Distance ESP Classes

Shari Joy Berman

2:30 – 3:15 (45 minutes) Room 4

Technology in Teaching (TnT)

Remote learning demands teachers be more resourceful, tech savvy, and creative than ever. This session introduces successful, concrete techniques for a productive, student-centered environment at a distance, predicated on original simultaneous interfacing of Zoom and Teams with LMS follow-up. Focus will be on ESP projects (medical, international horticulture majors) including multimedia presentations, tasks, out-of-class online group meetings, as well as alternative testing and large class management techniques. Workshop participants will experience/evaluate games, quick tasks, and projects. They will also view class video clips, and brainstorm ideas to increase the “net gain,” to perhaps make these multiplatform techniques their own.

OUTLINE

Background on Integrated English

Original Cooking Project—relevant to careers, international, social, high ownership

2020 Project—replicating online what had been done in the past
